 Wishes to inform that we have organized
Online program on
IATF 16949:2016 CORE TOOLS TRAINING
 By our Chief Consultant
Mr. Megavarnan

5 CORE TOOLS IATF 16949

1. Advanced Product Quality Planning
2. Failure Mode & Effect Analysis
www.learnqtools.in
3. Production Part Approval Process
4. Measurement System Analysis
5. Statistical Process Control

Program Outline

The 5 core tools serve as pillars of quality, reliability, efficiency, and continual improvement in organizations. Together these tools empower organizations to identify, prevent and eliminate defects at every stage of product as well as manufacturing process design and development. The Automotive Core Tools are the building blocks of an effective quality management system. Adds value in Production/Manufacturing processes through effective implementation of the core tools
